

RETROXX[®]

REFLECTIVE MATERIALS

RETROXX[®] REFLECTIVE PIPING

RETROXX[®] reflective materials work on light reflection principle. Light rays (e.g. from vehicle headlamps) hit the surface of reflective material and then are reflected back to the source. RETROXX[®] reflective materials improve the visibility during the night or in poor visibility. The base of RETROXX[®] reflective materials is highly reflective, metallized, glass microbeads.

Use:

- high-visibility clothing, backpacks, bags, sportswear, work footwear, trainers, etc.

Properties:

- high reflective efficiency
- easy handling when sewing
- very good reflective properties even after multiple washing and chemical cleaning
- in accordance with EN 20471 Class 2

Made in Czech Republic.

SPECIFICATION	EN ISO 20471 /RETROXX® SEW-ON/
DIMENSIONS AND PACKAGING:	
Piping width	1 cm *
Packaging /standard coil/	100 lm

* Different types of piping can be produced on customer request

Recommendation for treatment

- Do not use a chlorine bleach. 
- Avoid long soaking before washing.
- Do not use any bleaching agents.
- Do not use solvents to remove dirt.

RETROXX® REFLECTIVE PIPING | PRODUCT OVERVIEW

Type	Colour	Base material	Washing cycles
SEWED PIPING BAV		CO	60 washing cycles at 60 °C  30 chemical cleaning cycles 
SEWED PIPING		PES/BA	60 washing cycles at 60 °C  30 chemical cleaning cycles
