

SPURO® RecyBUBBLE

BUBBLE FOIL WITH 50% TO 80% RECYCLED CONTENT

Reliable protection of fragile products

Bubble foil with a minimum of 50% recycled material

SPURO® RecyBUBBLE Film is produced from a high-quality blend of PCR and PIR regranulates, with a recycled content of 50–80%, complemented by 20–50% standard PE. The bubble wrap is available in film thicknesses starting from 60 µm, ensuring reliable protection for a wide range of applications. The material is 100% recyclable, providing an eco-friendly yet highly effective packaging solution.

- | comparable strength and properties to standard bubble foil
- | environmentally friendly – reuse of raw materials
- | may contain traces of additives (for example antistatic, slip, UV)
- | possible odour due to the use of PCR regranulates
- | not suitable for contact with food
- | 100% recyclable

| TECHNICAL SPECIFICATION

Bubble size [mm]	Thickness [my]*	Width [mm]*	Length [m]*	Foil type
10	60	1000, 1200, 1500, 2000, 2500	100 / 150	2-layer
30	80	1000, 1200, 1500, 2000, 2500	30 / 50	2-layer

| COLOUR RANGE

honey gray

| RECYCLED CONTENT

at least 50% of PCR & PIR

| DESIGN

printing on request
